

# Mobile Invoicing

## Business Challenge

Client faced challenges with the invoice generation process at Stock Points. The existing processes were redundant due to system lag brought by disparate manual tracking systems and different work cultures.

## Technology Solution

Solution covers order booking, stock availability and invoice generation integrated and managed by inDice ERP solution. The solution provided real time data on stock in transit, stock at POS, stock movements and loss analysis.

## Technology Used

C#, Oracle

## Implementation challenges

- Paper based legacy datasheets prone to loss of data
- Reconciliation of cash with generated invoice
- Centralized tracking of Order Booking, Stock Availability and Invoice

## Overall Benefits

- Checks availability of stock at both stock points & across stock point offices
- Customer Order pending list can be viewed at any point in time
- Invoice generation made easy and with increased accuracy
- Invoicing of Transit goods dispatched through road to stock point offices
- Data synchronization with inDice ERP
