

# Implementation of CBS (Finacle)

## Business Need

Bahraini Saudi Bank (BSB) was running in their Legacy system (BANKMASTER) from Mysis in their 11 branches. The Bank's existing legacy system had difficulty in handling the sheer volume and complexity of today's data streams. Bank has chosen Finacle to replace its legacy core banking solution

## Technology Solution

End to end implementation of CBS (Finacle) for the bank including integration of all other sub systems of the bank with CBS. We have used Big Bang implementation strategy where Finacle implementation happened in single instance

## Technology Used

Finacle

## Implementation Process

- Detailed Requirement Gathering
- Business Process Definition
- Migration from Legacy system
- ATM, Kastle, Omnidocs, Balm interfaces
- Interface with third party application and Finacle CBS
- Customization of Statutory and MIS reports
- UAT, Parallel run & Go Live support

## Implementation challenges

- ATM Interface with non-ISO message format
- Building sub system interfaces – Kastle, Omnidocs, BALM, Central Bank Credit Information System

## Benefits

- Operational Improvements
- Cost reduction
